

SupaMobility SupaLite4

The SupaLite 4 has two front wheels, making it more stable than the SupaLite. It weights only 21,1 kg including battery and seat. The motor has enough power for all your daily needs. Simply remove the folding seat and battery, so you can fold down the steering and store the Scooter.

It has a lightweight frame and a small turn radius. The SupaLite 4 makes you mobile and eases your everyday life.
