

RAIZER

Raizer is a simple battery operated mobile lifting chair that helps a fallen person up to an almost standing position within a few minutes. Raizer can with ease be assembled and operated by only one assistant and does not require any physical effort besides a supportive hand.

A person who has fallen and cannot get up again is raised comfortably up to a sitting or almost standing position in a way that supports the entire body throughout the process. This way of lifting shows consideration for the importance of being helped up in a dignified and safe way.

Price without transport and taxes:

3.500,00 €
