Cleaning:

STAINLESS STEEL

Normal detergents can be used for cleaning, provided they do not contain chlorine and its compouds. When cleaning, it is important to follow the satin finish of stainless steel, without exerting too much pressure, For extremely stubborn stains, specific products for stainless steel should be used.

Important notes:

1. Do not use scouring pads or anything else that may scratch or scrape.
2. Avoid using muratic or bleach,
3. Do not leave iron objects on the tray for a long time.

ALUMINIUM

Clean with a slightly damp cloth and normal detergents, do not se sollvents or corrosive chemicals.
